Voice and Data Services

SIMs:

1- It is necessary to clearly know what services you have attributed for each SIM,

2- After the SIMs have been installed and the telephone was started, it is necessary that from **Settings → SIM management** to assign the services correctly:

   a- **Voice Call** can be assigned to any SIM,

   b- **Video Call** shall be assigned only to the SIM with 3G data,

   c- **Messages** can be assigned to any SIM.

   d- **Data Connexion** shall be assigned only to the SIM with 3G data and usually it is configured as well as **Video Call**.

Note:

1- If you have an on-going call on one of the SIMs, the other will be disconnected from the network and you will not be able to receive calls on this one until you finish the initial call. If the calls you are about to receive are very important we recommend to redirect calls from one SIM to the other and to activate the **Waiting Call**.

2- There is the possibility that mobile phone operators to change working frequencies in this case, the table above may no longer be valid.

3- APN Settings

If data service is not activated automatically after introducing the card and starting the telephone, you should manually set the APN (Access Point Name) details. These settings can be found on the official page of each mobile phone operator.

Download Applications from Android Market

a. Add a Google account
b. Enter Android Market (Play Store) and download apps.
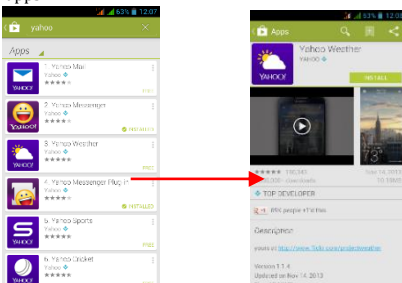

Email Account Configuration

1-   Gmail

Creating an email account

Select Gmail and follow the indicated steps. You can activate or edit extended email accounts or you can create a new email account.

Select Gmail and the Google account setting interface will   appear.   Then   select   Next/Create account/Introduce the name, surname and email address.

Google servers establish if the name can be used, and if it can be used, a new interface appears, requesting the introduction of the desired passwords. Afterwards, the strength of the password will be analysed, and the users who do not comply with requests will be asked to introduce again another password.

If the registration of a new Gmail account was made successfully, a message will be automatically created for testing.

Email account loading

Open Gmail, skip the introduction screen, and load the interface.

Introduce the name, password and then load.

Email account initialization will notify that the authentication was done successfully; all Google accounts will be synchronized.

Creating and sending emails

When you wish to create and email, select Email > Create Email. Introduce the address (recipient), subject and content. Press Menu to access Add Cc/Bcc, select Send or Cancel.

Receiving Emails

When receiving a new email you will be notified by an audio tone and an icon in the status bar. Slide the status bar downward, access the new mail, press Menu > Refresh to view all new unread mails.

Deleting Emails

When you select an email account, in order to delete it, you need to return to factory settings .When you set a second email account, press Menu to delete it.

Note: many functions depend on the Gmail account, for example: Electronic Market, Google Talk, Synchroniser, Contacts and Calendar.

2-   Another email account

Setting an Email account

Introduce the correct address and password, access Settings > set the right port and POP server, then verify the server settings automatically.

Set the correct SMTP server, verify the mail server settings for sending and receiving, then introduce the name of the specified account and the name displayed for outgoing emails and then save.

Creating and sending emails

When you want to send an email, select Email>Create email. Introduce the address (recipient), subject and content of the email. Press Menu to access Add Cc/Bcc, select send, cancel or save as draft.

Localisation and GPS

- Use wireless networks: check to allow device localisation through Wi-Fi networks or mobile networks;
- Use GPS satellites: check for localisation using the built-in GPS receiver;
- EPO assistance: activate to improve the localization time;
- A-GPS: activate to improve the localization time through mobile data network communication (it can lead to additional costs for data traffic);
Note:

1-   Google™ Map can be used as map but it requires permanent internet connexion,
2-   The telephone recognises the most common maps that function OFF-LINE.

Manage Applications/ Move to SD card

Enter Setting >Apps, then manage the applications.

As you install downloaded Apps, you need switch on "Unknown sources" in Security settings.

Maintenance & Safety

Please read and observe the following information for safe and proper use of your phone and to prevent damage. Also, keep the user guide in an accessible place at all the times after reading it.

1.   After sales service

Kindly refer to the Warranty Card provided in the sales package box.

2.   Charger and Adapter Safety

Charger and adapter are designed for indoor use only.

3.   Battery Information and Care

o   Please do not disassemble the rear cover of the mobile phone, since the battery is inbuilt.

o   Recharge the battery after long periods of non-use to maximize battery life.

o   Battery life will vary due to usage patterns and environmental conditions.

o   The self-protection function of the battery cuts the power of the phone when its operation is in an abnormal status. In this case, remove the battery from the phone, reinsert it, and turn the phone on.

4.   General Notice

o   Do not place items containing magnetic components such as a credit card, phone card, bank book, or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.

o   Talking on your phone for long period of time may reduce call quality due to heat generated during use.

o   When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.

o   Using the phone in proximity to receiving

equipment (i.e. TV or Radio) may cause interference to the phone.

o   Do not immerse your phone in water. If this happens, remove the battery and take it to an Authorized Service Centre.

o   The suitable temperature for the phone and accessories is -10℃~45℃.

o   When charging, please place the phone in an environment that has a normal room temperature and good ventilation. It is recommended to charge the phone in an environment with a temperature under 40℃. Please ensure to use only the charger offered by the manufacturer. Using unauthorized charger may cause danger and violate the authorization of the phone and the guarantee article.

o   Do not paint your phone.

o   The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers. (Ring tones, text messages, voice messages, picture, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.

o   Do not turn your phone on or off when the phone is close to your ear.

Warning:

Company will not bear any responsibility for any incompliance with the above guidelines or improper use of the mobile phone. Our company keeps the right to make modifications to any of the content here in this user guide without public announcement in advance. The content of this manual may vary from the actual content displayed in the device. In such case, the latter shall govern.

European Directives

CE marking is a mandatory conformity mark for products placed on market in the European Economic Area. CE Marking on a product ensures that the product complies with the essential requirements of the applicable EC directives.

This product is marked with the distinctive symbol for electrical and electronic waste selective sorting. This symbol indicates that the product must be accepted by a selective waste collection system, in accordance with the EU 2002/96/EC directive, so it can be recycled or dismantled to reduce the impact on the environment.

Attention! Electronic products that are not sorted selectively may affect the environment and people's health, as they may contain dangerous substances.

ROHS (Restriction on Hazardous Substances). This directive is a regulation that was implemented on 01 July 2006 and refers to restrictions on the marketing of products and electrical and electronic equipment containing hazardous substances such as lead, hexavalent chromium, cadmium, brominated biphenyl (PBB), polybrominated diphenyl ethers (PBDE).

E-BODA
